

AHA Equipment Service Program

AHA has partnered with Remi Healthcare to provide a proven cost savings alternative to Original Equipment Manufacturer service contracts. We consolidate your existing service contracts into one comprehensive agreement and remove the excess profit of having multiple service contracts from various vendors. You may continue to use your current vendor for service.

About Remi:

Since 1998, Remi has been a trusted partner and advocate of hospitals across the country. When it comes to protecting your best interest in the area of "Equipment Service" you can rely on Remi's trusted representatives and our years of experience.

Guaranteed Service Contract Savings

By consolidating your service contracts into a single service agreement, Remi can reduce your cost by an average of 15-22% over your entire service budget.

Extend the Life of Equipment

In most instances, Remi can extend the life of your aging equipment. In some instances, many years beyond when the manufacturer (OEM) deems the equipment has reached "End of Life" EOL.

In-House Service / Bio-Med Enhancement

Remi will reimburse your facility for any repairs performed by your in-house technicians, helping you expand and support your in-house capabilities with strategic parts sourcing and resource assistance.

24/7 Engineering and Support

Remi engineering support will work in tandem with your organization to find the best solution for equipment repairs and service.

Reporting

Remi Online reports track each service and repair, helping your organization track all your equipment repairs at the touch of a button.
