

Florida Hospital Association MANAGEMENT CORPORATION

PROVIDING LOCAL EXPERTS Health Information Management Services

In 1991, the Florida Hospital Association Management Corporation (FHAMC), a subsidiary of the Florida Hospital Association (FHA), developed a full range of health information management consulting and staffing solutions to serve the needs of Florida's hospitals. Over the past 20 years, FHAMC Health Information Management Services (HIMS) has provided temporary staffing, interim management, coding and compliance educational sessions and denial management services. Our team of credentialed American Health Information Management Association (AHIMA) professionals, physicians, UR/Case managers, and legal advisors combine a wealth of knowledge to ensure cost-effective service solutions for your hospital.

We provide the following services:

- Coding Support – Inpatient, Outpatient, on-site or remote
- Clinical Documentation Improvement staffing and training
- ICD-10-CM Preparedness Training
- Interim HIM Management
- Revenue Cycle and DNFB Management
- Operational Assessment and Performance Improvement
- Denial Risk Assessments
- Denial Review and Appeal

“When we are short staffed we can always depend on FHA to come through for us. Their employees are always professional, knowledgeable and always willing to pitch in and go that extra mile. Our HIM department needed help with E/M level training and FHA helped us train our new employees on E/M levels. They cover many areas in coding including management positions. They are great at answering questions and available when needed. FHA is our number one choice.”

Osceola Regional Medical Center
