Powering Compliance & Savings

## 340B Solutions for Hospitals, FQHCs and Pharmacies

### Industry Innovator in Managing 340B

SUNRx provides comprehensive 340B services for disproportionate share hospitals, sole community, critical access, and children's hospitals. Our split-billing solution virtually separates 340B and non-340B transactions in mixed-use settings to help ensure patient eligibility compliance, allowing hospitals to manage only one physical inventory.

SUNRx helps Federally Qualified Health Centers (FQHC) provide convenient access to affordable medications through efficient and effective 340B drug discount programs. Our fully automated system reduces regulatory risks, safeguards against drug diversion and duplicate discounts, and uses "lower of" pricing logic to deliver the lowest-cost option available.

Whether an entity seeks to supplement its in-house pharmacy or rely on outside pharmacies, SUNRx takes a hands-on approach developing a market-leading 340B-contracted pharmacy network that meets an entity's goals and provides patients with convenient access to 340B medications.

### Customer Service Experience

SUNRx has extensive experience implementing and managing 340B programs since 2006, and provides industry-leading audit support as evidenced by our positive audit findings. Clients and state hospital associations recognize our account teams as the most knowledgeable and customer-focused in the industry. SUNRx also offers integrated pharmacy benefit management (PBM) through its parent company, MedImpact Healthcare Systems, Inc., an independent, trend-focused PBM.

### Commitment to Compliance

SUNRx helps covered entities: maintain accurate and current 340B database information; recertify eligibility annually; prevent diversion to ineligible patients; prevent duplicate discounts; and prepare for program audits.

### Innovation

SUNRx technology integrates low-cost solutions, real-time processing, some of the most advanced compliance protocols and a cash program that allows entities to pass program savings on to their low-income and uninsured patients.

### Flexibility

SUNRx's 340B program can be implemented with any electronic medical record system, wholesaler, switch vendor or pharmacy to serve their patients for maximum flexibility and the greatest financial benefits.
