

340B. Simplified.®

Powering Compliance & Savings

SUNRx's 340B Split Billing System

Created specifically for covered entities managing drug purchasing in a "Mixed Use" setting (Inpatient/Outpatient). SUNRx's 340B Split Billing System enables users to simplify compliance and ensure savings. The SUNRx Split Billing System is an internet-based tool which allows Covered Entities to create replenishment orders for outpatient and inpatient settings, and track purchases within the entire Pharmacy Supply Chain with easily auditable reports. With compliance in mind, SUNRx built its entire reporting suite around HRSA guidelines, working closely with users to insure it meets their needs.

SUNRx's 340B Split Billing System is unlike any in the industry. Our one of a kind *PO Optimizer* add on helps reduce the pharmacy drug spend by maximizing purchase discounts. SUNRx accomplishes this by viewing a client's purchase orders line by line after it runs through the split in our 340B Split-Billing System. The Optimizer suggest alternative purchases based on lowest available price and accumulations.

- Fully customized web-based software
- Wholesaler and EMR independent
- Rapid implementation averages between 30–60 days
- Creates split, replenishment, or alternate supplier purchase orders
- Verifies accuracy of price and quantity delivered
