

Powering Your Performance Improvement

iVantage Health Analytics provides hospitals and healthcare systems with performance management analytic tools for benchmarking, strategic planning and payment optimization.

Our unique approach, which combines sophisticated tools with hands-on expert guidance, is engineered to create actionable and measurable performance improvement for our clients.

Some of the nation's largest health systems, regional providers and community hospitals rely on our cloud-based reporting and analytics to help identify and prioritize opportunities for market, clinical, financial and operational improvement.

"iVantage helps us to better understand the levers we need to pull to be successful going forward."

- *Betsy McVay, Chief Analytics Officer
UnityPoint Health*

Rigorous, transparent and collaborative data mapping ensures unmatched accuracy and drives apples-to-apples performance measurement.

An intuitive user interface easily translates analytic results into actionable insights.

A unique client service model promotes user engagement, trust and buy-in.

Better Tools and Methodology Lead to Real Performance Improvement

Benchmarking & Performance Management

Our benchmarking and performance management tool enables hospitals and health systems to identify and prioritize opportunities for operational, clinical quality and cost management improvement.

With exceptional accuracy and detail, iVantage Performance Manager™ analyzes performance over time and in comparison to affiliates, industry peers and self-selected cohorts.

Physician Office Performance Management

Our physician office performance management tool helps hospitals identify variance and prioritize opportunities for cost reduction at their physician practices.

Market Planning and Strategy

Our strategic market planning tool, iVantage Market Intelligence™, offers hospital strategists, planners and merger and acquisition teams access to current, actionable market intelligence.

Reimbursement Management

Our reimbursement analytics tool, iVantage Reimbursement Analyzer™, aggregates all payor, patient and payment data into a single application to optimize managed care contract revenue.

iVantage Health Analytics combines public and private data with proprietary analytics and methodologies to drive clinical and financial performance improvement, strategic planning, market assessment and contract optimization.

The iVantage Difference

- **Actionable Information**

Our data, reporting and analytics identify variation and translate opportunities into actionable and measurable performance improvement.

- **Superior Client Service**

Our personalized, dedicated client service model is built to help our clients achieve their performance improvement objectives.

- **Timely and Effective Peer Collaboration**

Our online communities enable users to learn and collaborate with peers to address challenges, share real-world experience and exchange high-performance practices.
