

340B. Simplified.®

Powering Compliance & Savings

Are you giving your patients access to the lowest prices for their medications?

340B Prescription Card Program Helps 340B Entities Pass Along Savings to Patients

Eligible hospitals and clinics struggle to stretch their scarce resources to provide the crucial services their patients need while maintaining financial security. And while many patients they serve can't afford to pay for high priced medications, it doesn't have to be this way — a 340B program administered by SUNRx can help.

SUNRx's 340B prescription card program provides a conduit for covered entities to pass along 340B savings to their patients. Because SUNRx is a wholly owned subsidiary of pharmacy benefit manager (PBM), MedImpact Healthcare Systems, this 340B prescription card program is unique from others. SUNRx confirms 340B patient eligibility and applies its "lower of" cost calculation to find the lowest price available for the patient. This process is accomplished in real time when your patient presents the 340B prescription card along with their prescription to the contract pharmacy. The patient gets the lowest price without waiting extra time when filling their prescription.

SUNRx also can work with each covered entity to develop and manage copay tiers for patients.

The SUNRx 340B prescription card program passes savings along to patients, making them more affordable. This helps the covered entity ensure their patients fill their prescriptions, effectively helping to decrease hospital readmissions that can result when patients don't fill their prescriptions because they cannot afford them.

SUNRx expertise, technology, pharmacy network and cash program enable entities to take full advantage of the 340B opportunity with minimal complications or risk.
